### **Abstract**

The manuscript should contain an abstract. The abstract should be self-contained, citation-free, and should not exceed 200 words. An abstract is a brief summary of a research article, thesis, review, conference proceeding, or any in-depth analysis of a particular subject and is often used to help the reader quickly ascertain the paper's purpose. When used, an abstract always appears at the beginning of a manuscript or typescript, acting as the point-of-entry for any given academic paper or patent application. Abstracting and indexing services for various academic disciplines are aimed at compiling a body of literature for that particular subject.

### **Indexing terms/Keywords:**

### **Subject Classification:**

## **Introduction**

This section should be succinct, with no subheadings.

## **Materials and Methods**

This part should contain sufficient detail that would enable all procedures to be repeated. It can be divided into subsections if several methods are described.

## **Results and Discussion**

This section may be divided into subsections or may be combined.

## **Main Text (Review only)**

This section may be divided into subsections or may be combined.

## **Conclusions**

This should clearly explain the main conclusions of the article, highlighting its importance and relevance.

## **Data Availability (excluding Review articles)**

This section should describe how readers may access the data underlying the findings of the study.

## **Conflicts of Interest**

Authors must declare all relevant interests that could be perceived as conflicting. Authors should explain why each interest may represent a conflict. If no conflicts exist, the authors should state this. Submitting authors are responsible for co-authors declaring their interests.

## **Funding Statement**

Authors should state how the research described in their article was funded, including grant numbers if applicable.

## **Acknowledgments**

All acknowledgments (if any) should be included at the very end of the manuscript before the references. Anyone who made a contribution to the research or manuscript, but who is not a listed author, should be acknowledged (with their permission).

## **References**

Authors should format in proper style. Authors are responsible for ensuring that the information in each reference is complete and accurate. All references should be numbered consecutively in the order of their first citation. Citations of references in the text should be identified using numbers in square brackets e.g., "as discussed by Smith [9]"; "as discussed elsewhere [9, 10]". All references should be cited within the text and uncited references will be removed.

## **Preparation of Figures**

Upon submission of an article, authors should include all figures and tables in the PDF file of the manuscript. Figures and tables should not be submitted in separate files. If the article is accepted, authors will be asked to

provide the source files of the figures. Each figure should be supplied in a separate electronic file. All figures should be cited in the manuscript in a consecutive order. Figures should be supplied in either vector art formats (Illustrator, EPS, WMF, FreeHand, CorelDraw, PowerPoint, Excel, etc.) or bitmap formats (Photoshop, TIFF, GIF, JPEG, etc.). Bitmap images should be of 300 dpi resolution at least unless the resolution is intentionally set to a lower level for scientific reasons. If a bitmap image has labels, the image and labels should be embedded in separate layers.

### **Preparation of Tables**

Tables should be cited consecutively in the text. Every table must have a descriptive title and if numerical measurements are given, the units should be included in the column heading. Vertical rules should not be used.

### **Supplementary Materials**

Supplementary materials are the additional parts to a manuscript, such as audio files, video clips, or datasets that might be of interest to readers. Authors can submit one file of supplementary material along with their manuscript through the Manuscript Tracking System. If there is more than one file, they can be uploaded as a .ZIP file.

A section titled "Supplementary Material" should be included before the references list with a concise description for each supplementary material file. Supplementary materials are not modified by our production team. Authors are responsible for providing the final supplementary materials files that will be published along with the article.

### **Proofs**

Corrected proofs must be returned to the publisher within two to three days of receipt. The publisher will do everything possible to ensure prompt publication.

### **Funding Statement**

Authors must state how the research and publication of their article was funded, by naming financially supporting body(s) (written out in full) followed by associated grant number(s) in square brackets (if applicable), for example: "This work was supported by the Engineering and Physical Sciences Research Council [grant numbers xxxx, yyyy]; the National Science Foundation [grant number zzzz]; and a Leverhulme Trust Research Project Grant".

If the research did not receive specific funding, but was performed as part of the employment of the authors, please name this employer. If the funder was involved in the manuscript writing, editing, approval, or decision to publish, please declare this.
